

Project code put under Github (Link in Usage)**Reference:**

Uses the pytorch version of BERT implemented by huggingface.

Link: <https://github.com/huggingface/pytorch-pretrained-BERT>

Usage:

Clone the github repository: <https://github.com/evan861109/pytorch-pretrained-BERT>, then put final_project.py under /pytorch-pretrained-BERT, then type the command: `python final_project.py`

Project Structure:

final_project.py: preprocessing, download model, use BERT, word2vec
